

Tilt & Lift Chair

Delivering the best quality and comfort in our tilt and lift chairs and electric beds in Australia.

Authentic thinking, Empathetic living.

Tilt & Lift Chair

Novacorr Healthcare have created a practical and beautifully designed range of custom lift chairs to ease the challenges faced by people living with a disability or simply a reduction in their mobility.

A Novacorr Tilt & Lift Chair is one of our flagship designs providing an investment in comfort, improved health and peace of mind. Our chairs are custom designed to suit the needs of every customer. Tilt & Lift Chairs contribute to improved health and general wellbeing improving circulation, reducing risk of shoulder strain or hip displacement, providing less pressure on joints and even pressure distribution.

Novacorr consultants are friendly and very knowledgeable. They work closely with both clients and healthcare professionals to complete a personal medical script that identifies specific health needs, measurements and physical requirements that influence each individual's chair design.

Our unique design allows for maximum comfort and for users to remain in a seated position as they recline. Elevating feet parallel to the heart helps reduce fluid retention in legs, ankles and feet. In the recline position, the chair offers a break at the knees to provide additional support, improve movement and stability. Novacorr Tilt & Lift Chairs are strong and manufactured to last using the highest quality components and materials.
